Feltnova

Machine Tapes for Paper Handling and Letter Sorting

Compare contact surfaces and belt geometry for paper feeders and mail sorters.

Paper handling

Check pickup on smooth, coated and dusty stock. Look for scuffing or double feeds during a trial.

Letter sorting

Test envelopes in the thickness and finish range used on the line. Pay attention to transfer gaps and any skew at the sensor.

Selection inputs

Record the pulley diameters, bend direction, tape dimensions and any cleaning agents used.
